

Multiple Cycle IVF Package

The multiple cycle package was developed to offer financial capitation for those couples with less predictable chances for pregnancy than those able to qualify for the IVF Refund Program. Realizing that more than one IVF attempt may be necessary to achieve pregnancy, we offer a package that offers substantial savings when compared to the individual standard fee for service price for a single IVF attempt. We must restrict this offer to qualifying couples in which the female is less than 45 years of age. All cycles must be completed within a twelve-month time frame including frozen embryo transfers.

For a fixed and substantially reduced fee, couples will receive a guarantee of up to three IVF attempts. With this option, there is no refund if pregnancy occurs or does not occur.

The Multiple Cycle IVF Package includes the following for up to a maximum of three stimulation cycles:

1. All pre-cycle monitoring of controlled ovarian hyperstimulation
 - i. Hormonal testing and interpretation
 - ii. Ultrasound monitoring and interpretation
2. Laboratory and surgeons fees for both egg retrieval and embryo transfer
 - i. Surgeon, ultrasound guidance, and surgical supplies
 - ii. Treatment with plasma expanders for those at high risk of ovarian hyperstimulation syndrome (albumin/hydroxyethylstarch)
 - iii. Oocyte identification
 - iv. Semen preparation and processing
 - v. Standard fertilization procedures
 - vi. ICSI fertilization if indicated
 - vii. Embryo culture for multi-cell or blastocyst stages of development
 - viii. Assisted embryo hatching
 - ix. Embryo transfer
 1. Surgeon, embryologist, and lab fees plus supplies
 - x. Cryopreservation of excess viable embryos beyond those transferred
 - xi. Storage of frozen embryos while active in Multiple Cycle IVF Package
3. Laboratory fees, surgeon fees, and supplies for frozen embryo transfer
4. Clinical services to document and verify pregnancy performed at our office only
 - i. Pregnancy testing and hormonal evaluation
 - ii. Ultrasound documentation of fetal number, location, and heart beat

Frozen embryo transfer attempts must be completed before the next fresh cycle but do not count as one of the three guaranteed fresh attempts. Miscarriage, ectopic gestation, preterm or term delivery with fetal death would not complete our agreement and remaining eligible cycles could be completed.

A viable pregnancy with the first fresh embryo transfer would complete the contract.

Items and specifics not covered in the cost of a Multiple Cycle IVF Package include:

1. Screening labs for male and female
2. Any indicated surgical procedures in preparation for the cycle
3. Medications to control and induce egg production and support pregnancy after
 - i. embryo transfer
4. Anesthesia fees
5. Any required care by ancillary physicians
 - i. Urologists for surgical sperm retrieval, anesthesia and facility fees, etc.
6. Processing of testicular tissue for sperm retrieval
7. Any complication including but not limited to
 - i. Ovarian hyperstimulation syndrome (OHSS)
 - ii. Ectopic pregnancy
 - iii. Any pregnancy complication
8. Embryo storage fee once pregnancy is established

Cost of the Multiple Cycle IVF Package:

The one time fee for this option is \$ 20,000.00.

Should poor performance lead to a decision to discontinue attempts to conceive, couples will have the option to withdraw, have their fees calculated based upon the standard fee for service option, and receive a refund of the unused amount.

A pour stimulation converted from IVF to IUI may be paid separately as a fee for service or counted as an IVF attempt at the couple's discretion with no additional fee required.

Our obligation to the couple will be considered fulfilled:

- With the delivery of an infant that survives 30 days after birth. At this time, fee for service for embryo storage and transfer will be implemented.
- After three IVF cycles are completed and all frozen embryos are transferred

We're hopeful that this information is helpful to couples as they consider their options and alternatives in this complex medical condition where both emotions and finances are strained. We will be happy to answer any additional questions about this or other programs offered by Woman's Center for Fertility and Advanced Reproductive Medicine.

By signing this document, we confirm that we have read, understood and had the opportunity to ask any and all questions about this explanation of the multiple cycle package for A Woman’s Center for Reproductive Medicine. We agree that we understand its content and will abide by the directives put forth in its body. Any and all questions that we had have been satisfactorily addressed as evidenced by our signatures affixed to this document.

Failing to qualify for participation will automatically make this document null and void. We understand that we may withdraw our participation at any time by submitting the request in writing to the Medical/Practice Director.
